

Specification as amended:

Figure [1A] 2 illustrates a network system comprising two or more computer systems that may implement an embodiment of the present invention;

Figure [1A] 2 - Computer Network

Figure [1A] 2 illustrates a system including a first computer system 82 that executes a first or main graphical program that is desired to be debugged, and a second computer system 90 that may store and/or execute a debugging graphical program. The computer system 82 may be connected through a network 84 (or a computer bus) to the second computer system 90. The computer systems 82 and 90 may each be any of various types, as desired. Also, the network 84 can also be any of various types, including a LAN (local area network), WAN (wide area network), the Internet, or an Intranet, among others.
